## ABOUT MININI

We meet the hygiene and sanitisation needs of renowned wholesalers operating in the professional sector with over 40 years of experience in producing, processing and marketing products and accessories for the professional cleaning/sanitisation of surfaces and personal hygiene.

Specialising in Tissue products, Nonwoven wipes, dispensers and accessories, we offer a wide range of articles that can be used in different sectors.

For more specific applications, we produce nonwoven folded wipes and rolls that can be customized in terms of material, size and packaging. We manufacture niche products to provide high-quality solutions even for our most demanding customers.

Our company stands for professionalism, helpfulness, market knowledge and commitment to continuous research and development of products. Our service accompanies the product from research to use and is an essential part of our offer.

### THE PARTNER TO BOOST YOUR BUSINESS

We work with professionals

### HIGH QUALITY

Constant search for high-quality products, market knowledge and commitment to continuous product research and development

### TAILOR-MADE PRODUCTS

We respond to your needs with customized products

# SPECIAL PRODUCTS FOR THE HEALTHCARE

## OUR RANGE AT A GLANCE

Our product range, including nonwoven wipe rolls, folded wipes, dispensers, accessories and systems, has been meticulously developed to enhance sanitisation quality in medical settings

A perfectly balanced blend of hygiene, safety and product excellence for professionals.

Tailored solutions to cater to your specific requirements.

## OBJECTIVES

In the healthcare sector, sanitisation, cleanliness and the prevention of cross-contamination play a crucial role. Despite strict hygiene regulations in healthcare settings, each year a significant number of individuals contract infections in hospitals from bacteria, viruses, germs and fungi that can thrive and spread quickly on various surfaces.

## SOLUTIONS

We are strongly committed to the search for efficient products, tests and certifications to ensure maximum safety in use. This is why, to ensure top-notch quality in critical medical fields, we prioritize the use of high-quality raw materials and use optimal processing techniques.

Our focus lies on optimizing the application process for hygiene professionals by simplifying the use of sanitising products in a highly effective manner, with an eye to cost effectiveness.

Each product is carefully designed for various purposes: sanitising and cleaning hospital rooms, clinics, common areas and any environment where the maximum hygiene standards are required.

## YOUR BENEFITS

- > Our focus lies on sourcing top-quality certified materials.
- > We understand your needs and tailor solutions accordingly.
- > The versatility of nonwoven fabrics enables an effective use across a wide range of applications.
- > Hygienic and safe packaging with dispensers featuring antibacterial protection and colour-coded caps for accurate application in different areas.
- > The use of premium materials ensures exceptional performance, particularly in the hospital sector, where top-notch standards are essential.

## NONWOVEN WIPES FOR CLEANING AND DISINFECTING SURFACES

**A system instead of a single product for cleaning and disinfecting** with the aim of optimizing the process and reducing the underlying costs. Improving the method means improving the quality.

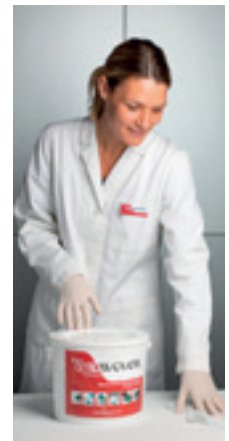

The V folded rolls of the **new Nexwoven® range are disposable nonwoven dry wipes to be soaked in a special dispenser with active antimicrobial protection.**

With this solution you can **choose the right wipe** and add the disinfectant to create a system in accordance with your needs.

Designed in compliance with the European regulations and considering the needs of users in the **healthcare sector, food industry and all those environments where hygienic safety is essential.** This solution is particularly suitable for all the applications in which hygiene requirements demand single-use products.

The **high quality** of the wipes guarantees **low-lint cleaning/sanitization on different materials and surfaces.**

# HOW TO PREPARE YOUR OWN SYSTEM PROFESSIONAL USE

# FASTCLEAN

Nonwoven Wipe Ideal for Surface Cleaning and Disinfection

Very soft wipe, suitable for use with detergents, sanitizers and polish. The V fold wipe absorbs the solution and releases it gradually on the surface to be treated. It removes oil and fat and is solvent resistant. It is also resistant to abrasion and friction in wet and dry conditions, lint-free. The material is skin friendly, according to the requirements of Standard 100 by OEKO-TEX (product class I).

**FASTCLEAN PREMIUM:** Cross lapped

**FASTCLEAN LR:** Parallel lapped

- + V folded wipes for better absorbency and release of sanitizers
- + Very soft but solvent resistant
- + Lint-free
- + Skin friendly
- + Stock and transportation costs saver, thanks to V folded pack

**VERIFIED  
LONG-TERM STABILITY**  
according to  
**EN 16615**  
4-field test  
in accredited  
laboratory

WIPE COD 1050-360\* - FASTCLEAN LR 90

PREMIUM

LR

## IDEAL FOR

- > Professional dry and wet surface cleaning and disinfection.
- > It can be combined with different kinds of liquids, which are released slowly on the surface thanks to its structure.

The tested wipe showed an adequate disinfecting effect in the 4-field test. The test was conducted immediately after the preparation of the system as well as after 90 days of use. Therefore, the tested product is fit for purpose and has the required long-term stability.

## INTENSIVECLEAN

Nonwoven Wipe with Higher Grammage and Stronger for Challenging Cleaning Situations

Soft wipe with a strong structure, particularly resistant and featuring high absorption capacity and speed. Its structure helps remove various kinds of liquids. Solvent resistant and suitable for use with detergents, sanitizers and polish. Its composition is ideal to remove tough dirt. Highly tear resistant as well as abrasion and friction resistant in wet and dry conditions. Lint-free. The material is skin friendly, according to the requirements of Standard 100 by OEKO-TEX (product class II).

- + V folded wipes for better absorbency and release of the liquid
- + Very soft but with a strong structure
- + Lint-free
- + Skin friendly
- + It saves storage and transportation costs thanks to the V folded format

# SANIFIX

Nonwoven Wipe Ideal for Surface Sanitisation

Thanks to its particular structure, this extremely soft wipe retains the liquid and releases it evenly on the surface. It can be soaked with different disinfectant or cleaning liquids. Particularly effective with disinfectants and sanitizers, it can also be used dry. This lint-free, tear-resistant and friction-resistant material is skin friendly, meeting the requirements of OEKO-TEX Standard 100 (product class I).

**SANIFIX PREMIUM:** Cross lapped

**SANIFIX LR:** Parallel lapped

- + Components of the Nexwoven system: wipes in V folded roll and dispenser with active antimicrobial protection
- + Dry rolls to be soaked with sanitizer
- + The liquid solution is retained and released evenly
- + High-quality nonwoven fabric
- + High resistance to solvents

## SPECIAL DISPENSER WITH ACTIVE ANTIMICROBIAL PROTECTION

Our dispensers have been enhanced with the Copptech technology that provides antimicrobial properties.

The deriving protection lasts throughout the entire product life cycle because is embedded in the plastic material, without leaching.

The Copptech patented technology complies with the European regulation standards and is registered with the EPA (Environmental Protection Agency, USA).

**SUITABLE FOR** Nexwoven® V folded rolls:

- > SANIFIX
- > FASTCLEAN
- > INTENSIVECLEAN

### EFFECTIVENESS AND ACCREDITATION

Tests certified by TÜV SÜD in 2019, according to ISO 22196-2011 (Measurement of antibacterial activity on plastics and other non-porous surfaces).

#### Proven results:

- E-Coli bacteria: reduction of 99.9% after 24h.
- Listeria bacteria: reduction of 99.6% after 24h.
- MRSA bacteria: reduction of 93% after 24h.

Effectiveness does not diminish after cleaning cycles with common chemicals.

# CLEAN

**Multi-purpose Nonwoven Wipe for Cleaning and Absorbing Liquids. Z pleat Fold. Made from Natural Fibres.**

The multi-purpose disposable nonwoven wipe is ideal for cleaning and absorbing spills with ease. In addition, its high absorption capacity and resistance make it incredibly efficient. It easily absorbs and dries oil, grease and water and is suitable for use with most solvents, detergents and sanitizers, even on the most delicate surfaces. Z pleat fold. Low lint to help prevent surface damage. The wipe is made from 100% natural fibres, thus reducing the environmental impact of cleaning routines. Cost effectiveness is also a top priority with the hygienic single-sheet dispensing system that allows to reduce waste. Keeping your workstation in order becomes easier with a new approach to cleaning.

- + High liquid, oil and fat absorbency
- + Durable
- + Exceptional resistance to friction
- + Soft on smooth surfaces
- + Lint-free

## IDEAL FOR

> All those applications where fast drying and absorption of liquids are required.

	Product category	Product name	Code	Colour				
	Z pleat fold	<b>NEXWIPES®</b> CLEAN	<b>4050-328</b>	white	<b>50</b>	<b>Closed</b> <b>20 x 18 cm</b>	<b>Open</b> <b>40 x 36 cm</b>	<b>6</b>

# FASTCLEAN CC

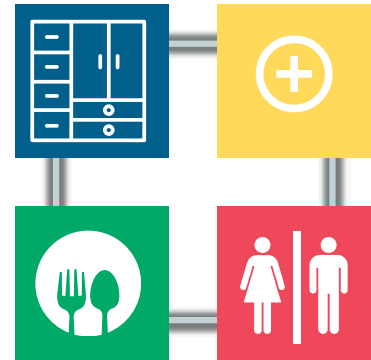

Multipurpose Folded Nonwoven Wipes for Surface Cleaning with Colour-Coded Options

This multipurpose nonwoven wipe is especially designed to deliver superior cleaning and sanitising performance across a wide range of surfaces. Available in the colour-coded options blue, green, red and yellow, it ensures safe and hygienic cleaning in various environments while preventing cross-contamination, including hospitals, healthcare facilities and the food and hospitality industry. Made from high-quality, durable nonwoven material, this wipe is highly absorbent, dries quickly and effectively removes dirt, grime and germs. It quickly absorbs liquids and dries faster than traditional wipes, reducing the risk of bacterial proliferation. Safe for use on delicate surfaces, which are left streak-free and spotless.

- + Enhanced hygiene with colour coding
- + Superior absorbency and fast drying
- + It leaves no scratches
- + Lint-Free
- + Versatile: for wet and dry cleaning
- + Ergonomic design: lightweight and easy to handle

**PRODUCTS  
FOR DAILY  
PERSONAL CARE**

## NONWOVEN WIPES FOR PERSONAL CARE

## FOR THE HYGIENE OF BEDRIDDEN AND LONG-TERM NURSING PATIENTS

Professional line of folded wipes essential for the hygiene of bedridden patients, non-self sufficient individuals or simply when fast hygiene is needed. Ideal for healthcare environments, nursing homes or home patients. The wipes make the daily hygiene of different body parts a pleasant moment for the patient and simplify the daily hygiene procedures for the personnel.

We have developed a complete range with different types of materials, sizes and textures to offer the most suitable product for the hygiene of every patient and to enable the personnel to carry out their job in safety and comfort.

The wipes can be used with the practical dispenser that allows a quick single-sheet extraction and thanks to the fold the personnel can open the wipes using one hand only without touching the other ones, thus preventing possible cross contamination.

# AIRFLAT

Tissue-Effect Wipe for the Hygiene of Sensitive Skin

Special wipe with tissue effect but much more resistant, lint-free, with high absorption capacity and speed. Smooth surface and very soft also when wet. The material is suitable for food contact. It is skin friendly (patch test). Available in the Light version for any use, medium grammage and in the Strong version, for higher performance and specific needs, high grammage.

**AIRFLAT LIGHT:** middle grammage

**AIRFLAT STRONG:** heavy grammage

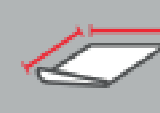

- + Tissue effect
- + Lint-free
- + High absorption capacity and speed
- + Skin friendly
- + 2 versions: Light and Strong for particular needs

## IDEAL FOR

# EXCELLENT

Multipurpose Nonwoven Folded Wipe for Cleaning and Absorption of Liquids

This wipe has an embossed surface that makes it soft and thick but at the same time is particularly strong and resistant to tear and friction. Excellent also offers high absorption capacity and rate for liquids, oils and greasy substances. Moreover, it can be wrung out and used several times, according to your needs and the degree of dirt. In addition, Excellent is pleasing to the touch and the eye, thanks to the nice look of its fabric. It is suitable for direct contact with skin, according to the requirements of the Standard 100 by OEKO-TEX (Class I products) and safe for food contact.

- + Extremely strong and durable
- + Exceptional tear and friction resistance
- + Soft and smooth surface
- + Lint-free
- + High liquid, oil and fat absorbency
- + Skin-friendly
- + Safe for food contact
